- **Glass Bottle:** 500 ml, 750 ml, 1 Litre

Krispy Sparkling Water

- Sparkling water is a naturally occurring carbonated water that contains some minerals. Krispy Sparkling naturally lightly sparkled at the source to boost its crisp and sweet taste. Naturally occurring minerals like calcium, magnesium, and other electrolytes make Krispy Sparkling a hydrating and healthy alternative, without sugar or additives.
- Krispy Sparkling Water is the motivation you need for better hydration. Unlike soda water which uses RO and demineralises water, Krispy Sparkling retains the goodness of its healthy natural minerals. Drinking carbonated natural mineral water like Krispy Water can aid digestion and help keep you feeling full for longer. Pair it with a meal, use it as a mixer or enjoy chilled as is.

BUBBLY & LIVELY: A light-flavoured fizzy drink for every palate. Discover Jeera, Mango, Orange, Lemon, and Blue Berry in a revolutionary new form – sweet but has no sugar, delish but has no calories.

ZERO FAT, ZERO CALORIES: That's right! Absolutely none of the stuff that makes you think twice. We've gone the extra mile on this one!

NO SUCH THING AS SUGAR: This bubbly work of wonder contains NO ADDED SUGAR. Not one bit! It is perfect for fitness enthusiasts, diabetics in specified serving and or simply for anybody who loves taking health seriously!

HYDRATE, HOMIE: This drink is a healthy alternative to regular aerated drinks in the sense of not having sugar. A fizzy miracle that keeps you hydrated! Movie night? Date night? Party night? You've got an all-in-one superstar!

WHAT TO EXPECT: Crisp, bubbly, with a hint of Jeera, Mango, Orange, Lemon, Blue Berry to keep yourself feeling fresh! Your ultimate green light for good vibes!

Pack Size: 200 ml, 1000 ml

About us

In a lifestyle ridden with erratic sleep patterns, irregular eating habits, a largely unhealthy diet, and increased stress, we all need to detox occasionally to cleanse our bodies and refresh our minds. Detoxing the body has become a trend due to lifestyles that may lead to an increase in multiple health risks.
